MOIZ ASIF

BS Artificial Intelligence Student | AI & Full-Stack Developer
(+92) 315 0007800 • moizasif07@gmail.com • linkedin.com/in/moizasif33 • github.com/moizasif07

PROFESSIONAL SUMMARY

Motivated BS Artificial Intelligence student with practical experience building end-to-end AI-powered applications spanning Computer Vision, NLP, and Retrieval-Augmented Generation (RAG). Skilled in developing full-stack web platforms using React and Node.js alongside intelligent backend systems built with Python and FastAPI. Focused on applying machine learning, neural networks, and agentic AI techniques to solve real-world problems through clean, scalable software.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++
Frontend & Backend: React.js, Node.js, FastAPI, Express.js, REST APIs
AI / ML: TensorFlow, Keras, Scikit-learn, LangChain, OpenCV, CNNs, NLP, RAG, TF-IDF, Semantic Search
Databases: MySQL, MongoDB, Vector Databases
Tools: Git, Docker

PROJECTS

Legal AI Agent (Final Year Project) | *LangChain · RAG · React · FastAPI · Node.js · Vector DB*

- Architected a legal AI assistant using RAG and LangChain to answer queries from Pakistani legal databases (PLD, SCMR, CLC) with high contextual accuracy.
- Engineered automated scraping pipelines to extract and vectorize judgments and revenue records, enabling precise semantic search and retrieval.
- Developed a React frontend with a FastAPI + Node.js backend, delivering a seamless, low-latency user experience.

Smart Learning Management System | *React · FastAPI · Node.js · TF-IDF · MySQL*

- Engineered a full-stack classroom platform with student submission portal, assignment management, and performance tracking.
- Implemented an AI-driven plagiarism checker for PDF uploads using TF-IDF vectorization, automatically flagging similar or duplicate submissions.

Essence Organic Hair Oil – E-Commerce Website | *React · Node.js · REST API · MongoDB*

- Developed a complete e-commerce storefront with product catalog, filtering, cart, and checkout flows using React and Node.js.
- Designed REST API endpoints for product and order management, ensuring clean separation between frontend and backend layers.

ASL Detection System | *TensorFlow · Keras · OpenCV · Python*

- Engineered a real-time hand gesture recognition model using CNNs and OpenCV to classify American Sign Language characters from live video.

NLP Predictive Modeling | *Python · Scikit-learn · BERT · TF-IDF*

- Designed a fake news detection pipeline using fine-tuned BERT embeddings and TF-IDF vectorization for accurate binary text classification.

EDUCATION & CERTIFICATIONS

BS Artificial Intelligence — COMSATS University Islamabad, Lahore Campus | 2023 – 2027 (Expected)
Intermediate – ICS — Punjab Group of Colleges (PGC), Kasur Campus | 2021 – 2023

Google Career Certificates (Coursera):

- Google IT Automation with Python
- Google Data Analytics

DeepLearning.AI (Coursera):

- Supervised Machine Learning: Regression and Classification
- Advanced Learning Algorithms
